DESCRIPTION OF WORK PERFORMED

RE: PATIENT TRANSPORT CARDIFF – 2/7 PENNANT STREET, CARDIFF 2285

- Door was down at time; we ran and noted drive chain jumping; stopped door; sprocket loose; re-aligned and tightened
- Chain was loose so loosened motor and re-tightened chain
- Re-set mechanical limits; if door was to go fully open this touches on flashing (noted previously)

The above works have been carried out in accordance with relevant Australian Standards and Codes of Practice.

RECOMMENDATIONS

- Top of guides to be cut and pulled out off door by about 15mm so as to miss flashing (see pics)
- Monitor drum spring tension
- Drive Chain should be replaced as it has 3 links already in place
