DESCRIPTION OF WORK PERFORMED

RE: HARVEY NORMAN BENNETTS GREEN

- Door driven into by truck when not fully open and pulled from inside building to outside
- Cut guides; unjammed door
- Used onsite forklift and jimmy bar to get door back from outside to inside
- Timber structure surround that holds guides are cracked
- Door placed 'Out of Service' however can be manually opened using hand chain
- Site was re-secured however alarm system attached to guides was removed for door to be re-fitted; was unable to be re-attached as guides were cut

The above works have been carried out in accordance with relevant Australian Standards and Codes of Practice.

RECOMMENDATIONS

- Replace curtain
- Replace guides
- Replace timber surrounds
- Ideally replace motor as motor was also noted to be leaking oil from gear box
