**Summary** Garage door broken

### Description

The tenant for this property has reported an issue with the garage door. See details below from tenant.

We were just sitting inside today and heard a loud bang from the garage. I went to check and realised that the garage door has broken. It looks like the rivets on one side popped out and it has come off the frame and the spring flew off.

So, now the door is off and the garage is open and clearly needs to be repaired/replaced.
