45MINS When I arrived, the car was still under the door approximately half way through the door. Owner of the car says the door come down as she was exiting the gate and that the beam didn't stop the door. I did test the beam and it seemed to stop the door ok, not sure if faulty or not I disconnected the push arm to free the car, then I straightened the bottom panel and put all the wheels back in the tracks, I straightened the tracks and tested the door, ok The door could use new wheels x10 as they are pretty old and bottom panel needs replacing, QUOTE TO FOLLOW IF YOU HAVE VIDEO FOOTAGE OF THE DOOR COMING DOWN ON CAR THAT WOULD BE GREAT AS BEAM SEEMS TO BE WORKING FINE BUT THEN WE CAN SEE IF FAULTY OR BOARD FAULTY	1.00	540.00	10%	540.00
