Description of work

Garage door not working properly

"This evening when I arrived home and opened the garage door the bolts holding a bracket on the left side of the garage had come loose and dropped on the floor. When trying to reattach the bracket the extension spring came off the lower anchor and I'm unable to reattach it.

Attached is a photo of the right side which is still intact.

I was able to close the door, however, the door is now unstable and unable to stay open."
